MARCH'2014

DRIVING INNOVATION.  
DELIVERING PERFORMANCE.

Thermo King is committed to being the world leader in transport temperature control. What started as a simple ingenuity in 1938 continues to shape the global industry of transport refrigeration.

## THERMO KING HISTORY

The sheer ingenuity of combining an engine, a compressor and a condenser to cool trucks in 1938 created an entire industry of transport refrigeration units. To this day, Thermo King still leads the world in the innovation of high performance heating and cooling units for a variety of mobile applications, including trailers, truck bodies, buses, shipboard containers and rail cars.
